Project 1 : Topic Selection

Name: *VintageVixen*

Topic Description: This website is essentially going to be a mixture of an online thrift store and a regular shop. It will be a shop where buyers can source vintage early 2000s pieces and with verification, you can also sell vintage pieces of your own from that time period to buyers. This can create a community of buyers with similar style taste in early 2000s fashion. The site will include curated collections, featured items, and seasonal highlights to help users find the best pieces easily. Additionally, the website will incorporate style guides, trend inspiration, and tips on how to mix vintage with modern fashion.

Pages of the Website:

- Home

- Shop / Marketplace

- Collections (Y2K Clothing, Accessories, Limited Edition)

- Sell Your Vintage (Submission page for verified sellers)

- About Us

- Contact

- Style Tips

 Data Description: VintageVixen will store detailed information about each item listed on the website.

 Each item entry will include:

- Item Name

- Description

- Category (Clothing, Accessories)

- Size

- Color

- Year or era (2000–2009)

- Price

- Seller information (Verified Seller Only)

- Stock quantity

- Images

Only administrators and verified sellers will have the ability to add, edit, or remove listings on the site. To manage this, the website will implement secure user accounts with login credentials. Administrators will have full access to manage all content, while regular users can create accounts to make purchases, save favorite items, and submit their own vintage pieces for verification. The website will also track user activity, such as purchase history and wishlist items, to improve the shopping experience and provide personalized recommendations in the future.
